BOSNIA-HERZEGOVINA CHEMICALS INDUSTRY TO EXCEED PLAN

FULFILL PLAN 83.5 PERCENT TO DATE -- Oslobodjenje, 6 Jun 51

Most of the industrial chemicals enterprises in Bosnia-Herzegovina will exceed the 1951 half yearly production plan. To date the industrial chemicals enterprises of Bosnia-Herzegovina have fulfilled the plan 83.5 percent. If the "Terpentin" (Turpentine) and "Astro" Factories, which have lacked raw materials, are excepted, chemicals production has increased over 1950, and is 6 percent higher in value.

The Match Factory in Dolac has fulfilled 93 percent of its 1951 6-month production plan to date, and is expected to exceed it 10 percent by 10 June.

The Cellulose Factory in Prijedor will fulfill its 6-month plan 105 percent.

The "Elektrobosna" Industrial Chemical Factory in Jajce will fulfill its 6month plan 112 percent.

The Wood Distillery in Teslic will fulfill its plan only if it exceeds its operational plan for June. This condition has resulted from insufficient electric power and coal and need for equipment repair.

The Terpentin" Factory in Dobrun will fulfill its plan 105 percent potentially if its lack of raw materials is excepted. The same is true of the "Astro". Soap Factory in Alipasin Most, which, due to a scarcity of industrial fats, fulfilled the production plan for May only 61 percent.

The Industrial Oxygen Plant in Rajlovac will not be able to fulfill its plan because the production plan exceeds the plant's production capacity.

The Soda Factory in Lukavac will not fulfill its plan because it is too high. The factory needs control and measuring apparatus and special imported equipment for maintaining operation.

NEW NITROGEN COMPOUNDS FACTORY BEING BUILT -- Oslobodjenje, 9 Jun 51

The first nitrogen compounds factory in Yugoslavia is being built in Bosnia-Herzegovina, near the Miljevina mine. Work is nearing completion on 18 buildings Comprising 70 apartments, and on a building containing 50 bachelor rooms. Work has begun on an equal number of additional buildings, which are to be completed has begun on an equal number of additional buildings, industrial railroad tracks, at the same time as the industrial buildings. Roads, industrial railroad tracks, and auxiliary buildings are under construction. The "Romanija" Republic Construction Enterprise is to begin work soon on the construction of the main industrial buildings.

Coal, the one raw material for the production of nitrogen compounds, is to be supplied by the Miljevina mine.

The railroad from Foca to Miljevina is to be rebuilt.

The new factory is scheduled for completion by the end of 1952.
